

Good Day,

I am writing in response to the position of Software Engineer. After a career change into software engineering, I've experienced first hand how much work it requires to get involved in something, and be successful. Technology leads, Society follows! I love combining the worlds of logic, and creativity to make user-friendly websites and apps. I am excited to make the leap, to continue advancing and also to continue refining my skills with the right company.

I would bring a service-focused, and a hard-working attitude to this role. I recently graduated, and completed a software engineering course at the Flatiron school. I have a knack for problem solving, and I work well with others. I am motivated, reliable, and resourceful. I am a self starter, and like to learn new things. I hope to provide quality service that you can count on everyday.

I would like to take this time to "Thank You" for taking time out of your busy schedule to review my candidacy for this position.

Sincerely,

Robert Morales
