## FULL STACK WEB DEVELOPER

---

My experience owning and running a gym, and training hundreds of clients give me strong entrepreneurial, managerial, and customer service skills. Twenty years of professional experience, including a year at flatiron bootcamp building apps, and a 8 week Java intensive course provided by Infosys makes me confident of the value I'll bring to tech companies.

---

## TECHNICAL SKILLS

---

Javascript, jQuery, Python, Angular, React, ReactQuery, Nextjs, Typescript, Bootstrap, ChakraUI, Ruby on Rails, Java, Spring Tools, NodeJS, mySQL, RapidAPI, FireBase, PostgreSQL, Postman, Git, Heroku.

---

## TECHNICAL PROJECTS

---

### Trainer Client Appointment Scheduler - [Github](#) | [Demo](#)

An App that creates appointments for clients that execute training with a specific personal trainer.

- Utilized Rails to create a client component, allowing trainers to add clients' appointments to the database.
- Applied React to build out the user interface, and established a rating system that allows users to rate clients.
- Employed full CRUD functionality, and RESTful routes in API giving users the ability to create, read, update, and delete clientele and appointments as needed.

### RealEstate App - [Github](#) | [Demo](#)

This Project is a real estate application that allows users to rent, purchase, and filter based on custom needs.

- Applied Chakra-ui for easy customization, scalability, and vast library/component accessibility.
- Successfully generated database with rapidAPI to fetch data from unlimited sources.
- Implemented Next.js framework for static generation and server-side rendering.

### Dream Car Garage - [Github](#) | [Demo](#)

An app that lists and shows a collection of exotic cars.

- Applied Reactjs, and constructed a car container component to house all the cars in the database.
- Utilized fetch request with React to retrieve data from the database, and display it to the UI.
- Outfitted a React form for users to submit data to the backend.

### React Shopping Cart - [Github](#) | [Demo](#)

This app showcases a shopping cart.

- This project is a web shop with a shopping cart. As the consumer you can add items, delete items, and it recalculates and displays the total sum amount.
- Here we implemented using libraries such as material Ui, ReactQuery, typescript, and style components for the best possible UX.

### Drop Zone App - [Github](#) | [Demo](#)

This web app provides drag and drop functionality to file uploads.

- Adopted Firebase database to upload image files, and data.
- Utilized moment package from the React library to apply timestamp when files are uploaded.

### Portfolio 2.0 - [Github](#) | [Demo](#)

This project showcases my professional portfolio.

- Used React frontend with html, css, custom properties, and general styles.
- Provided Javascript to enable dynamic web page interactivity.

---

## EDUCATION

---

### Apprentice Now

Full Stack Web Development-Java, Spring Tools, Angular

2022

### Flatiron School

Full Stack Web Development- Ruby on Rails and JavaScript program

2022
