Jersey City, NJ

Result-driven and analytical IT individual with ability to oversee software design and development while remaining focused on client needs. Talent for driving quality and consistency throughout all phases of software projects. Adept at using technologies and common tools to develop large-scale web applications in compliance with high-quality standards. Proven ability to partner with business analysts, testers, and stakeholders throughout production life-cycle to develop user-friendly and bug-free software.

Technical Proficiencies & Skills

Tools & Other: Ruby on Rails | Java | JavaScript | Angular | Typescript | Spring Tools | Postgres | MySQL | Heroku | Git

Skills & Competencies: Software Development Lifecycle (SDLC) | Full-stack Development | Technical Innovation | Strategic Planning & Analysis | Project/Program Management | Continuous Process Improvement | Quality Assurance & Testing | Cross-functional Collaboration | Software Support & Maintenance | Database Management

Education

Full Stack Web Development – Java, Spring Tools, and Angular, Apprentice Now | 2022

Software Engineer, Flatiron School | 2021 – 2022

Experience Highlights

Flatiron School, NYC
Software Engineer

2021 – 2022

Gained knowledge of developing full-stack applications using Ruby On Rails and React js, with over 1500+ hours of hands-on experience designing and building secure REST APIs and becoming expert in several programming languages such as JavaScript and Ruby. Enhanced time management, learning agility, and decisiveness in intensive environment. Utilized error-driven development to debug applications, and learned code organization by implementing MVC, CRUD, and creating RESTful APIs.

- Moved through 5 phases, each with necessary code challenges to continue forward in curriculum and full-stack projects.
- Completed comprehensive software engineering coursework in context of modern web infrastructure.
- Attended 10-Month online software engineering program and built expertise in following:
 - Frontend: JS fundamentals (ES6+), Component Pattern, React.js, Redux, jQuery
 - Backend: Ruby fundamentals, MVC pattern, SQL, Active Record, Ruby on Rails

Academic Projects

Capstone Project: Trainer Appointment Scheduler | Ruby on Rails

- Designed Rails-powered appointment scheduling application that resolves time-management and customer-service issues from personal trainer's perspective.
- Employed full CRUD functionality, and RESTful routes for easy seamless UI & UX.

Exotic Car Showcase | React, JavaScript

- Implemented Object Oriented Programming (OOP) fundamentals to create reusable components.
- Utilized React form to input new data, submit to database, and show in browser.

Technical Projects

RealEstate Application | React, Chakra-UI, RapidAPI

- Developed an application that allows users to search for rentals and purchase properties based on individual needs.
- Leveraged RapidAPI to retrieve aggregated data from multiple real estate providers and display on UI.

React Shopping Cart | React, Typescript, Material-UI

- Created web store with shopping cart that allows customers to add and remove things, as well as compute and display total amount.
- Implemented MaterialUI for CSS to expedite application development for best possible user experience (UI).

Drop Zone Application | NextJS, TailwindCSS, Firebase Database

- Developed application that allows users to enter text, drag, and drop multiple files to dropzone and display to browser.
- Utilized React-Timestamp to display file upload date and time.

Certifications

Certificate, Java Intense – Apprentice Now

Certificate – Online Software Engineering - Flatiron
