FULL STACK WEB DEVELOPER

My experience owning and running a gym, and training hundreds of clients give me strong entrepreneurial, management, and customer service skills. Twenty years of professional experience, including a year at flatiron bootcamp building apps, makes me confident of the value I'll bring to tech companies.

TECHNICAL SKILLS

Javascript, Python, React, ReactQuery,, Nextjs, Typescript, Bootstrap, ChakraUI, Ruby on Rails, Java, Spring Tools, AWS, NodeJS, RapidAPI, FireBase, PostgreSQL, Git, Heroku

TECHNICAL PROJECTS

RealEstate App - [Github](#) | [Demo](#)

This Project is a real estate application that allows users to rent, purchase, and filter based on custom needs.

- Applied Chakra-ui for easy customization, scalability, and vast library/component accessibility.
- Successfully generated database with rapidAPI to fetch data from unlimited sources.
- Implemented Next.js framework for static generation and server-side rendering.

Drop Zone App - [Github](#) | [Demo](#)

This web app provides drag and drop functionality to file uploads.

- Applied Firebase database to upload image files, and data.
- Utilized moment package from the React library to apply timestamp when files are uploaded.

Trainer Client Appointment Scheduler - [Github](#) | [Demo](#)

An App that creates appointments for clients that execute training with a specific personal trainer.

- Utilized Rails to create a client component, allowing trainers to add clients' appointments to the database.
- Applied React to build out the user interface, and established a rating system that allows users to rate clients.
- Employed full CRUD functionality, and RESTful routes in API giving users the ability to create, read, update, and delete clientele and appointments as needed.

Dream Car Garage - [Github](#) | [Demo](#)

An app that lists and shows a collection of exotic cars.

- Applied reactjs, and constructed a car container component to house all the cars in the database.
- Utilized fetch request with react to retrieve data from the backend, and display it to the UI.
- Outfitted a React form for users to submit data to the backend.

React Shopping Cart - [Github](#) | [Demo](#)

This app showcases a shopping cart.

- This project is a web shop with a shopping cart. As the consumer you can add items, delete items, and it recalculates and displays the total sum amount.
- Here we implemented using libraries such as material Ui, reactQuery, typescript, and style components for the best possible UX.

Portfolio 2.0 - [Github](#) | [Demo](#)

This project showcases my professional portfolio.

- Used react frontend with html, css, custom properties, and general styles.
- Provided javascript to enable dynamic web page interactivity.

EDUCATION

Flatiron School

Full Stack Web Development, Ruby on Rails and JavaScript program

05/2021 - 01/2022

Apprentice Now

Full Stack Web Development, Java, Javascript, Spring Tools, Angular, and AWS

07/2022 - 09/2022
