Full Stack Web Developer

My experience owning and running a gym, and training hundreds of clients give me strong entrepreneurial, management, and customer service skills. Twenty years of professional experience, including a year at flatiron bootcamp building apps, makes me confident of the value I'll bring to tech companies.

TECHNICAL SKILLS

Javascript, React, Ruby on Rails, Nextjs, APIs, PostgreSQL, Git, Heroku

TECHNICAL PROJECTS

Trainer Client Appointment Scheduler - [Github](#) | [Demo](#)

An App that creates appointments for clients that execute training with a specific personal trainer.

- Utilized Rails to create client component, allowing trainers to add clients appointments to the database
- Applied React to build out user interface, and establishing a rating system that allows users to rate clients
- Employed full CRUD functionality, and RESTful routes in API giving users the ability to create, read, update, and delete clientele and appointments as needed
- Established email response feature through the use of React for each appointment for the client

Dream Car Garage - [Github](#) | [Demo](#)

An app that lists and shows a collection of exoti cars.

- Created frontend using React, and constructed a car container component to house all the cars in the database
- Utilized fetch request with react to retrieve data from the backend, and display it to the UI
- Outfitted a React form for users to submit data to backend

Bad Dad Jokes - [Github](#) | [Demo](#)

- Developed an interactive app using React in developing UI
- Implemented a counter when like button is clicked using React, and increments when event is triggered
